

Veolia Environmental Services-SA Environmental Policy

The Scope of Veolia Environmental Services' activities are the provision of environmental waste and recyclable management as well as industrial Services throughout South Africa. VES-SA is committed to the protection and conservation of the natural environment. This commitment is recognised not only as intrinsic to the practical and sustainable success of the business, but also in satisfying the expectations of all of the Company's stakeholders including the broader community.

To deliver on this commitment VES-SA will seek to accomplish the following objectives:

- Conduct all activities in an environmentally responsible and competent manner, so as to minimise the potential for pollution and environmental impact.
- Comply with all applicable environmental legislation, regulation and other requirements related to the environmental aspects of VES-SA activities and services.
- Develop a sense of environmental responsibility within all employees.
- Establish and periodically review the identified environmental objectives and targets related to its operations.
- Regularly monitor, assess and review all activities in relation to environmental performance to ensure that environmental commitments are valid and satisfied.
- Responsibly implement preventative and corrective actions where identified as necessary.
- Apply a pro-active, flexible, innovative and practical approach, to continual operational and environmental improvement.
- Build and sustain alliances with role players, policy makers and industry, in an effort to advance well-consulted, clear and united environmental objectives.
- Liaise with suppliers, sub-contractors and clients, to achieve a high level of environmental performance.

Every employee and sub-contractor of VES-SA is responsible for adhering to this Policy and its collective environmental objectives. The policy provides recognition that contributing to maintaining a healthy environment is in the best interests of VES-SA's employees, clients, the broader community and the long-term sustainability of VES-SA.

This Policy should be read in conjunction with the VES-SA Sustainable Development Policy which is available from the Veolia Environmental Services Compliance Division.

Richard Sanders
